

## We know you care, beyond the clinic walls.

What your patients do when they're not in the chair matters.

Do they brush, floss, and gargle regularly? Follow your hygiene advice in between check-ups? Clean and protect their important oral appliances every day as you instructed? We already know the answers.

So, what if you could support your patients to properly care for their oral appliances at home?

### The all-in-one solution to a common problem.

Dr Mark's HyGenie® is the answer to many of the problems associated with oral appliance hygiene and protection. It's an all-in-one system for optimal home care of all types of removable oral appliances.

When you include Dr Mark's HyGenie, you're not just building your bottom line, you're building that important patient relationship – beyond the clinic walls.

## Building great things takes patience (and a little extra effort).

Just like your patient relationships take time to nurture, great inventions take time to cultivate. That's why we went through five years of product development, trial and error before we were confident Dr Mark's HyGenie was ready for your practice and your patients.

Give your patients something great.
